Vanguard Target Retirement Funds (2015, 2020, 2025, 2030, 2035, 2040, 2045, 2050, 2055, 2060 Institutional Class) will be the Defaulted QDIA depending upon participant age, unless otherwise requested.

Performance data represents past performance. Past performance is no guarantee of future results, and current performance may be higher or lower than the performance displayed. The investment return and principal value of an investment will fluctuate such that an investor's shares, when redeemed, may be worth more or less than their original cost. Total returns include reinvestment of dividends and capital gains and are net of all fees and expenses related only to the fund itself.

Underlying Fund Performance information is current as of the stated date and has been obtained from sources that are believed to be reliable. Wealth Management LLC, a Registered Investment Advisor, have not independently verified the return of each fund.

An Investment in these funds could lose money over short or long periods of time. Past performance is not necessarily an indication of future performance. In addition, the performance information set forth above in the "Portfolio Performance" section does not reflect the charges assessed by the plan. If it did, the annual total return would be lower.

Return figures reflect investor share class returns (indicated in italics).
